Re: Letter of Support for “Verso il cibo del futuro: cell-based meat and seafood”

Dear Prof. Lo Sapio & Project Planning Team,

We are writing today in order to express our support for the project titled "Verso il cibo del futuro: cell-based meat and seafood," led by Professor Luca Lo Sapio. As the project aims at: (i) establishing a network of experts in the field of cultivated meat and seafood (ii) creating guidelines for this industry; (iii) raising public awareness about this growing sector; (iv) providing consultancy services for industries and organizations interested in cellular agriculture, it fits within our vision of growth for this new industry.

The project's outcomes could help industry decision-makers, government policymakers, investors, and consumers make informed choices to maximize the benefits of cellular agriculture. As such, our organization is excited to apply the project's findings to support our efforts to accelerate the transition to sustainable protein systems.

We support this proposal and would like to contribute to its success by providing input to steer the stakeholders, and gain access to the results as they become available. We intend to offer an understanding of potential research gaps and commercialization opportunities for the sector, a wide network of contacts in the cellular agriculture industry, and knowledge of the policy frameworks and measures needed to advance cellular agriculture.

Sincerely,

A handwritten signature in black ink, appearing to read 'Robert E. Jones'.
